

IntervueX - Interview Evaluation Report

Interview ID: 9

Interview Type: Technical

Difficulty Level: Medium

Overall Score: 28%

Total Questions: 10

Answered Questions: 10

Time Taken: 5m 20s

Completed At: 2026-07-24 14:51:10 UTC

Detailed Evaluation Breakdown

Question 1: Can you tell me about yourself and your educational background at Mumbai University, where you studied Bachelor of Technology?

Your Answer: I am Sujal Patil, a software engineer graduated from Mumbai University with a B.Tech degree.

Score Rating: 2 / 5 (32%)

Feedback: Basic response. Needs more technical depth and elaboration. Compare your answer with the Ideal Answer.

Question 2: I notice from your resume that you have experience in your role as a Software Engineer. Can you describe your primary responsibilities and a key challenge you solved there?

Your Answer: Yes, as a software engineer I built microservices and handled databases.

Score Rating: 1 / 5 (24%)

Feedback: Incomplete answer. Please review the ideal technical answer to strengthen your response.

Question 3: One of the projects listed on your resume is 'E-Commerce Web Application'. What were the main technologies used, and how did you resolve any performance or design bottlenecks?

Your Answer: I used Python and Redis for the chatbot and solved database load bottlenecks.

Score Rating: 1 / 5 (24%)

Feedback: Incomplete answer. Please review the ideal technical answer to strengthen your response.

Question 4: One of the projects listed on your resume is 'Smart Chatbot System'. What were the main technologies used, and how did you resolve any performance or design bottlenecks?

Your Answer: In the e-commerce project, I used React, nextjs, and node to optimize frontend speed.

Score Rating: 1 / 5 (24%)

Feedback: Incomplete answer. Please review the ideal technical answer to strengthen your response.

Question 5: You hold the 'AWS Certified Solutions Architect Associate' certification. How has this credential helped you solve practical engineering challenges in your work?

Your Answer: AWS certification helped me design cloud infrastructure according to best practices.

Score Rating: 1 / 5 (24%)

Feedback: Incomplete answer. Please review the ideal technical answer to strengthen your response.

Question 6: What are React Hooks (useState, useEffect, useMemo, useCallback)?

Your Answer: Decorators wrap function behavior dynamically using @ decorator syntax in Python.

Score Rating: 1 / 5 (24%)

Feedback: Incomplete answer. Please review the ideal technical answer to strengthen your response.

Question 7: How does the JavaScript Event Loop and Call Stack handle asynchronous code?

Your Answer: JavaScript event loop pushes async callbacks to call stack when empty.

Score Rating: 3 / 5 (54%)

Feedback: Satisfactory answer. Mentioned key ideas but missed some important technical details.

Question 8: Explain the Virtual DOM and reconciliation algorithm in React.

Your Answer: Closures remember their lexical parent scope variables after execution.

Score Rating: 1 / 5 (24%)

Feedback: Incomplete answer. Please review the ideal technical answer to strengthen your response.

Question 9: What is closure in JavaScript and how does it work?

Your Answer: React virtual DOM compares virtual nodes and batch-updates the real DOM.

Score Rating: 1 / 5 (24%)

Feedback: Incomplete answer. Please review the ideal technical answer to strengthen your response.

Question 10: How does Python handle memory management and garbage collection?

Your Answer: Functional hooks like useState and useEffect manage component state and side effects.

Score Rating: 1 / 5 (24%)

Feedback: Incomplete answer. Please review the ideal technical answer to strengthen your response.
